Course Outline

Day One

Fundamentals of Crew Leadership

Introduces the basics of construction crew leadership. Presents the industry today, handling people today, need for training, and supervision skills. Sets the plan for the foreman training program.

Getting the Job Done

Following company policy and procedures; planning and communicating with the crew; planning and communicating with superintendents and PM's; management by walking around.

Leadership Part One

Leadership skills defined. Types of leadership and management; characteristics of leaders in construction; functions of foreman as leaders.

Day Two

Leadership Part Two

Continues from leadership 1 with "expected leadership behavior today"; communication skills (including case study workshop); employee motivation and accountability; team building; typical problem solving.

Project Control

Phases of a construction project; planning; types of schedules; types of costs; controlling costs by managing resources.

Day Three

Safety

Reviewing essentials of project safety; describing the risks of safety failures; conducting safety tool-box talks and why.

Project Estimating and Budgeting

Describe the estimating process; project budgets and how they must be managed by the foreman.

Review and Module Exam

Review and deliver the NCCER Fundamentals of Crew Leadership module exam. Wrap up with feedback from participants.
